

Note from Andrew Houghton, Environment Agency

Following a recent restructure of the flood risk management teams in the Environment Agency, Dave Turner is moving to a different post. We now have 3 teams in covering the flood risk management function as follows:

- **Asset Performance** – role includes operation and management of Environment Agency flood risk assets. Team Leader [Andrew Houghton](#)
- **Partnership & Strategic Overview** – role includes flood risk management overview role and work with external partners such as Cornwall Council to identify future flood risk strategies and schemes. Team Leader [Steve Marks](#)
- **Flood Resilience** – role includes working with communities to develop community flood resilience. Team Leader [Kevin Barnes](#)

I attended the HHAC meeting and will provide details for a member of the Asset Performance who will attend when appropriate in future. I suggest you contact me in the meantime. I can direct the query to one of the other flood risk management teams where necessary. It would be helpful if you can provide advance notice of flood risk management issues you would like to discuss at the HHAC we can endeavour to ensure the most appropriate officer attends.

As mentioned Andrew Blewett is the Environment Management Officer who has attended the group when appropriate. As requested Andrew's contact details are Andrew.blewett@environment-agency.gov.uk, phone 01208 265484.

By all means feel free to contact me if you have any queries

Regards

Andrew Houghton, Asset Performance Team Leader
